### EXAMINER'S AMENDMENT

1. The new drawings dated 07/14/2006, along with the changes in the specification, have been disapproved. The original disclosure does not teach the specificities of the two straps as shown, e.g. the location of the rings and the buckles.

2. In view of the explanations, the drawing objections as set forth in the previous Office Action is withdrawn.

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claims 3-7: "of claim 1" has been changed to --of claim 15--.

In claim 5, "the graphic" has been changed --front face panel--.

4. Note that applicant request changing the dependency from claim 1 to claim 15 as set forth in applicant's response dated 07/14/06. The change in claim 5 corrects a minor mistake of antecedent basis.

5. The following is a statement of reasons for the indication of allowable subject matter:

The claim recites a vinyl record attached to a substrate similarly configured and sized, and a U-shaped structure having bend and creases. Note that Shore teaches a jacket for phonograph.

Shore fails to teach the record being similarly configured and sized and the U-shaped structure.

It is noted of Molnar et al. (6976579) showing a case with a with a pocket in the cover as shown in Fig. 10 for attaching a media content. It is noted that Molnar fails to teach the U-shaped

Art Unit: 3727

structure. Furthermore, there is no motivation to provide a U shaped structure in Molnar and it would make difficult to access the other pockets inside Molnar. It is also noted of Trager (1768496) and Kuhn (387200), each teaches a U shaped section. However, there is not teaching of a record jacket attached to substrate and a vinyl record attached to another substrate on the two panels.
